Company.)

Treasurer,
Patricia Graef
(Patricia Graef
Consulting, Inc.)

Director,
Lynda Bartlett
(Nederman
MikroPul LLC)

Director,
Rodney Kohler
(Victory Turbine)

Director,
James Staudt
(Andover
Technologies)

TICA encourages gas turbine users to benefit from its limited-time offer through June 30, 2025, of complimentary membership for at least one year and save from \$500 to \$1,000, depending on the type of business of the gas turbine user. TICA's current membership of 87 includes over 60 gas turbine users. The TICA membership benefits for gas turbine users, and the list of current gas turbine user members are available on the [TICA website](#). The benefits for gas turbine users include the following:

- Full version of the [TIC Performance Calculator](#)
- Full version of the [TIC Installation Database](#)
- Access to experts for all [TIC technologies](#)
- Opportunities to impact TICA activities to reflect the needs of gas turbine users.

The [TICA membership form](#) is available online.

TICA invites users and operators of gas turbines, as well as others interested in marketing equipment or services for gas turbine cooling to follow [TICA on its LinkedIn page](#), and start discussions to get answers to your questions about turbine inlet cooling.

If you have any questions, please call 630-357-3960 or send us an [e-mail](#).

TIC provides a cost-effective, energy-efficient, and environmentally beneficial means to improve power generation capacity and efficiency during hot weather. TIC is also a pathway for decarbonizing the electric grid.

Turbine Inlet Cooling Association (TICA) is a non-profit trade association that promotes the development and exchange of knowledge related to gas turbine inlet cooling (TIC) to enhance power generation worldwide.
